📍 Beijing, China

SUMMARY

- Strong expertise in end-to-end system design, building customer-facing applications, admin dashboards, and internal tools across headless CMS and commerce platforms, including Shopify.
- Proven track record developing RESTful and microservice-based APIs with Express and NestJS, and deploying production systems on AWS using Lambda, ECS/Fargate, S3, and CloudFront.
- Experienced in integrating third-party services, payment systems, webhooks, and automation workflows to support startup and enterprise client solutions.
- Hands-on with AI-powered features, performance optimization, monitoring, and cloud observability using CloudWatch and modern DevOps practices.
- Passionate about clean architecture, mentoring engineers, and collaborating with cross-functional teams to deliver high-quality solutions in fast-paced, client-driven environments.

EXPERIENCE

Senior Full Stack Engineer

NES Fircroft China

📅 05/2023 - 11/2025 📍 Shanghai, China

- Built scalable enterprise web platforms supporting recruitment, workforce management, and client portals using React, Next.js, NestJS, and headless CMS, delivering secure, SEO-friendly interfaces for global users.
- Developed intelligent automation and AI-assisted tools using local LLMs, vector search, and internal knowledge bases, improving recruiter efficiency, candidate engagement, and response times across support workflows.
- Enabled cross-team adoption of shared frontend components across global engineering teams by supporting both JavaScript and TypeScript codebases and enforcing versioned release standards.
- Developed AI-powered features and conversational interfaces using LLM integrations, vector search, and custom chat UIs, increasing user engagement by ~40% and reducing customer support response times by ~30%.
- Designed and maintained a reusable UI SDK and component library with React, TypeScript, and design system standards, improving UI consistency, accessibility, and development speed across multiple client projects.
- Built headless commerce and Shopify integrations, including Storefront/Admin API usage, webhooks, and custom backend services to support complex client requirements.

Full Stack Engineer

Reverb

📅 08/2021 - 01/2023 📍 Chicago, Illinois, USA

- Collaborated closely with product, design, and data teams to ship features that improved conversion, retention, and seller success metrics.
- Built real-time features such as messaging, listing updates, and notifications, enabling seamless buyer-seller communication and faster transaction cycles.
- Deployed and operated cloud-native services on AWS, supporting horizontally scalable marketplace features with strong performance and uptime guarantees.
- Led CI/CD pipeline optimization using GitHub Actions and cloud monitoring, improving deployment frequency by 25% and reducing production regressions.

EDUCATION

Master of Computer University

Peking University

📅 09/2016 - 12/2018 📍 Beijing, China

Bachelor of Computer University

Tsinghua University

📅 01/2013 - 02/2016 📍 Beijing, Chian

EXPERIENCE

Full Stack Engineer

SoluLab

01/2020 - 06/2021 Oshawa, Ontario

- Built scalable APIs integrating AWS services (S3, EC2, Lambda) to manage application assets, background jobs, and deployment operations for client platforms.
- Designed automation scripts and backend processes to support platform maintenance, monitoring, and data validation, improving operational efficiency by ~50%.
- Developed Node.js/Express.js backend services to automate e-commerce and SaaS operational workflows, reducing manual processing by ~70%.
- Built scalable APIs integrating AWS services (S3, EC2, Lambda) to manage application assets, background jobs, and deployment operations for client platforms.
- Implemented RESTful APIs and internal tooling to streamline data synchronization between Shopify, third-party services, and custom admin dashboards.

Software Developer

Infograins Software Solutions

02/2019 - 12/2019 New York, USA

- Managed high-throughput services across AWS Lambda, ECS, and Fargate, scaling infrastructure to handle 1M+ daily API requests for SaaS and e-commerce platforms.
- Collaborated closely with QA, DevOps, and frontend teams to achieve 100% test coverage, authored run books, and supported multiple client product teams during continuous integration and deployment.
- Implemented monitoring, logging, and alerting with CloudWatch, X-Ray, and Grafana, reducing incident response times by 40%.
